

### **Moment Weight Solution for Power Generation**

Raptor Scientific is the world leader in providing the most accurate mass properties measurement instruments and solutions. We also offer cost-effective solutions for applications that do not require the highest accuracy. For power generation turbines, Raptor Scientific offers a line of moment weight measurement instruments and software applications to solve your power turbine balancing needs. This product line reduces setup time and cost for power generation suppliers.

Raptor Scientific also provides blade adapters that hold test blades to the moment weight instrument to ensure reliability and consistency in moment weight measurements. We have a catalog of more than 120 blade adapters in our portfolio, but if you have a blade that is unique or not yet in our collection, we can custom design and manufacture the correct adapter for you.

### **Mass Properties Measurement Seminars**

We are re-opening our facilities for in-person seminars beginning this coming Fall.  
Our next seminar will be held October 19 - 21, 2021

**How are we doing? Please let us hear from you.**

### **Recent Business Activity**

- Model POI3500 Spin Balance Instrument - Defense Services
- Model KSR2200 Mass Properties Instrument - International Defense Services
- Model KSR330-60 Mass Properties Instrument - Defense Services
- CG and MOI Measurement Services - Defense Services
- Model 101-5HJ-NAV Igniter Circuit Testers - Electronics Testing
